

PATIENT'S RIGHT TO SHOP: Rewarding Patients with Incentives When They Choose Less Expensive Care Options

Public Employee Shared Savings Incentive Programs exist in the following states: FL, NH, KS, KY, MO, TX, UT, and VA. They may be the only enrollees with access in the state to such programs, and are therefore classified as a state with limited access, as those on individual and small business health plans may not have access. A few carriers do offer a limited add-on to plans that reward patients to shop, but those programs are not reflected on this map.
